

HIGHLIGHTS

Plastic-Free Emory is a student-led collaboration with faculty, staff, administrators, and practitioners at Emory dedicated to tackling single-use plastic on Emory & Oxford campuses. PFE is using outreach, education, policy changes, and most importantly a **“Break Free From Plastic”** pledge, signed by President Fenves, to establish a task force and plan in 2026 to reduce unnecessary single-use plastic.

Single-use plastics are flawed by design: they use a material made to last forever but are designed to be thrown away and are sometimes only used for a few moments before polluting the Earth for years to come.

BENEFITS

- Emory University prioritizes socially actionable, ethically engaged, and inquiry driven pursuits: three values that are inextricably linked to sustainability advocacy on campus. PFE believes it is important to educate people on the various effects of plastic pollution on the environment and human health.
- Plastic Free Emory researches and encourages key institutional changes to reduce unnecessary single-use plastic at Emory. To do this, PFE uses data from their single-use plastic survey and case studies to promote policy changes on campus.
- PFE holds the University and the administration accountable to the Break Free From Plastic Pledge and furthers sustainability efforts around campus.

TAKE ACTION NOW!

SIGN THE PETITIONS

Do your part in affecting sustainability in our community by signing our petitions, which we have verified and compiled for your

HOW IT WORKS

Outreach:

- Single-use plastic cannot be reduced on campus without making institutional and individual choices that align with this goal. PFE ensures that everyone in the Emory community feels heard and supported through various educational events, social media, and a survey that aims to gauge the community’s attitudes toward single-use plastics and Emory’s current waste management system.

Education:

- Unnecessary single-use plastic is an extremely intersectional issue. PFE believes it is important to educate people on the various effects of plastic pollution on the environment and human health.

Policy Changes:

- Institutional changes are key to reducing unnecessary single-use plastic at Emory. To do this, PFE uses data from a survey and case studies to promote policy changes on campus:

BREAK FREE FROM PLASTIC PLEDGE

A campus pledge inspired by Post Landfill Action Network's Toolkit which guides colleges and universities toward single-use plastic elimination. Many academic institutions nationwide have signed similar pledges, enacted stringent purchasing guidelines, phased-out plastic bags and food service items in retail and dining locations, and committed to single-use plastic elimination by 2025.

LEARN MORE

Plastic Free Emory is recruiting motivated members from diverse departments, backgrounds, and majors for the task force. Visit <https://plasticfreeemory.carrd.co> or [their website](#) to learn more about the project or email nsnaray@emory.edu if you have any questions!
